## LUMA BY HALLMARK

Explore our collection of truly affordable homes, designed for the first home buyer who expects more. More style, more space and more flexibility than ever before. So, if you thought you couldn't afford the kind of home you've been dreaming of, think again. Think Luma.

### GET MORE ON A SMALLER LOT.

Make the most of your space with efficient, innovative home designs. Discover our brilliant range of single storey homes built for narrow lots, ranging from 10m – 12.5m. You'll love our flexible floor plans, on-trend facades and upgrade options to suit your lifestyle.

# MAXIMISE Space WITH LUMA

At Hallmark Homes, we don't believe you should be constrained by budget. Just because you're a first home buyer doesn't mean you should have to settle for less. We knew there had to be a better way to give you what you want, so we started with a blank canvas and reimagined what was possible.

## CLEVER, CONSIDERED DESIGNS.

Luma by Hallmark is different. Rather than working with an existing range and taking things out to suit your budget, our designers came up with a completely fresh new range of 21 premium home designs, featuring must have, on-trend living concepts. Quite simply, you've got the best of the best to choose from, at the most affordable price possible.

## WE LISTENED TO YOU.

We took the time to understand what you wanted in your new home and then worked out a way to make it happen. As a result, the Luma range is bursting with your most requested layouts, design features, inclusions and finishes, such as on-trend façades, generous stone island benches, full sized laundries, plus much more.

## HOW DOES LUMA WORK?

Luma's bespoke design system with interchangeable custom modules means you can mix and match to get exactly what you want, without blowing the budget. And with Luma, all the hard work has been done for you. Every single home design in the range is customisable, depending on what's important to you.

First, choose the floor plan that suits the way you want to live. Then, you can either go with it as is, or select from the custom-designed modules. It's so easy, and it's all pre-priced and ready to go, so you know exactly where you're at from the very start.
